

# How to make leaf rubbing pictures

You will need:

Paper

Wax crayons

## Step 1

Collect your leaves. Try to get ones that aren't too dried out as they will crumble. If your leaves are wet, dry them off.

## Step 2

Place a leaf under your paper with the bottom, textured side of the leaf facing up.

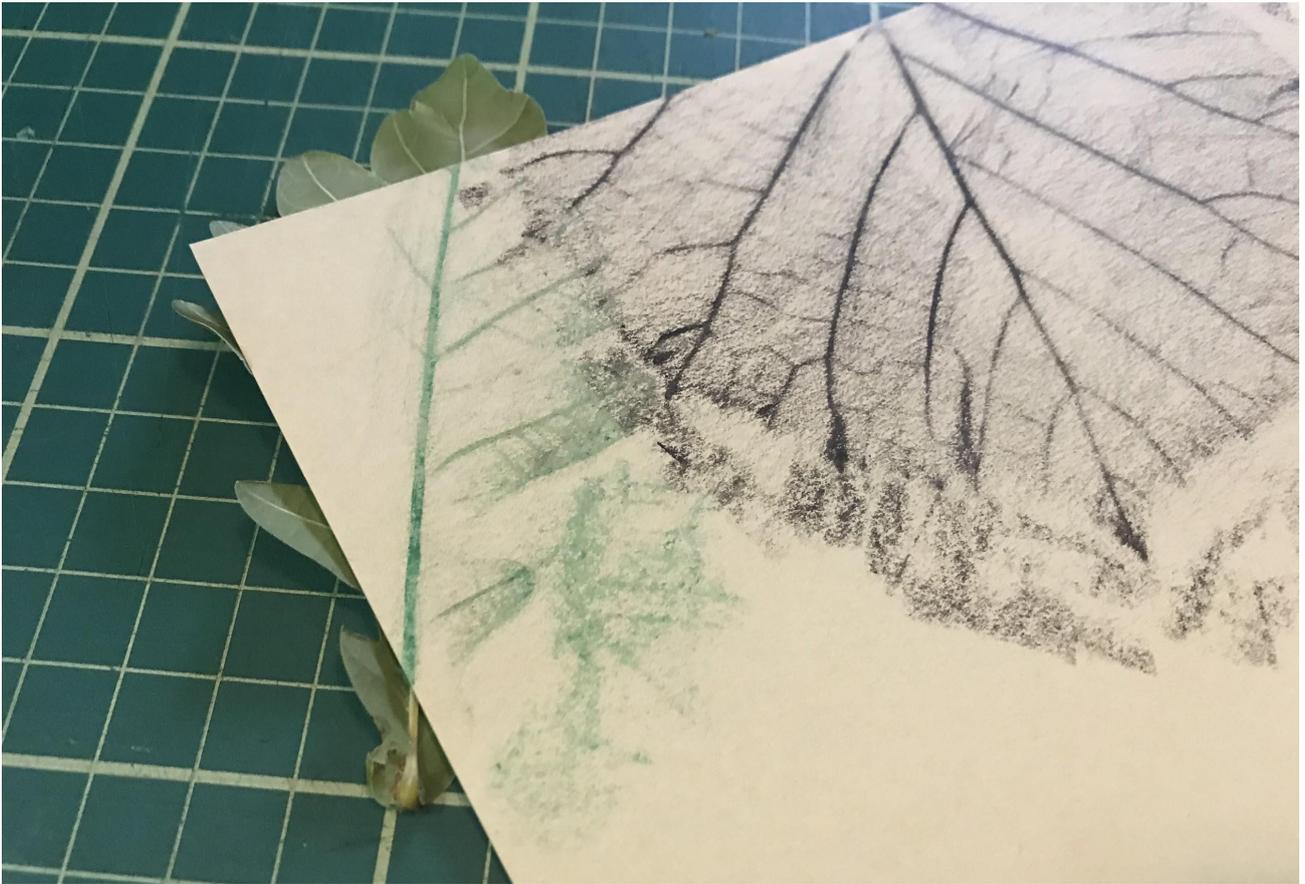

## Step 3

If your crayons have paper wrappers on them, take them off and pick a colour. Turn the wax crayon on its side and rub the crayon

## Step 4

Repeat step 3 with different leaves and different colours and fill your paper.
