

# Swab Test

Some people have a virus called Coronavirus.

This makes them feel unwell.

The doctor or nurse will do a test to see if you have the virus.

They will wear an apron, gloves, mask and eye/face protection to do the swab test.

The swab looks like a long cotton bud.

The doctor or nurse will put the swab into your mouth.

The doctor or nurse will put the swab into your nose.

The doctor or nurse will send the swab away to be tested.

If you have any questions, ask the doctor or nurse.
